

A. J. Sackett Case Study

Job: B4537 Customer: Wedgworths Location: Moore Haven, FL
Date Commissioned: October 12, 2007

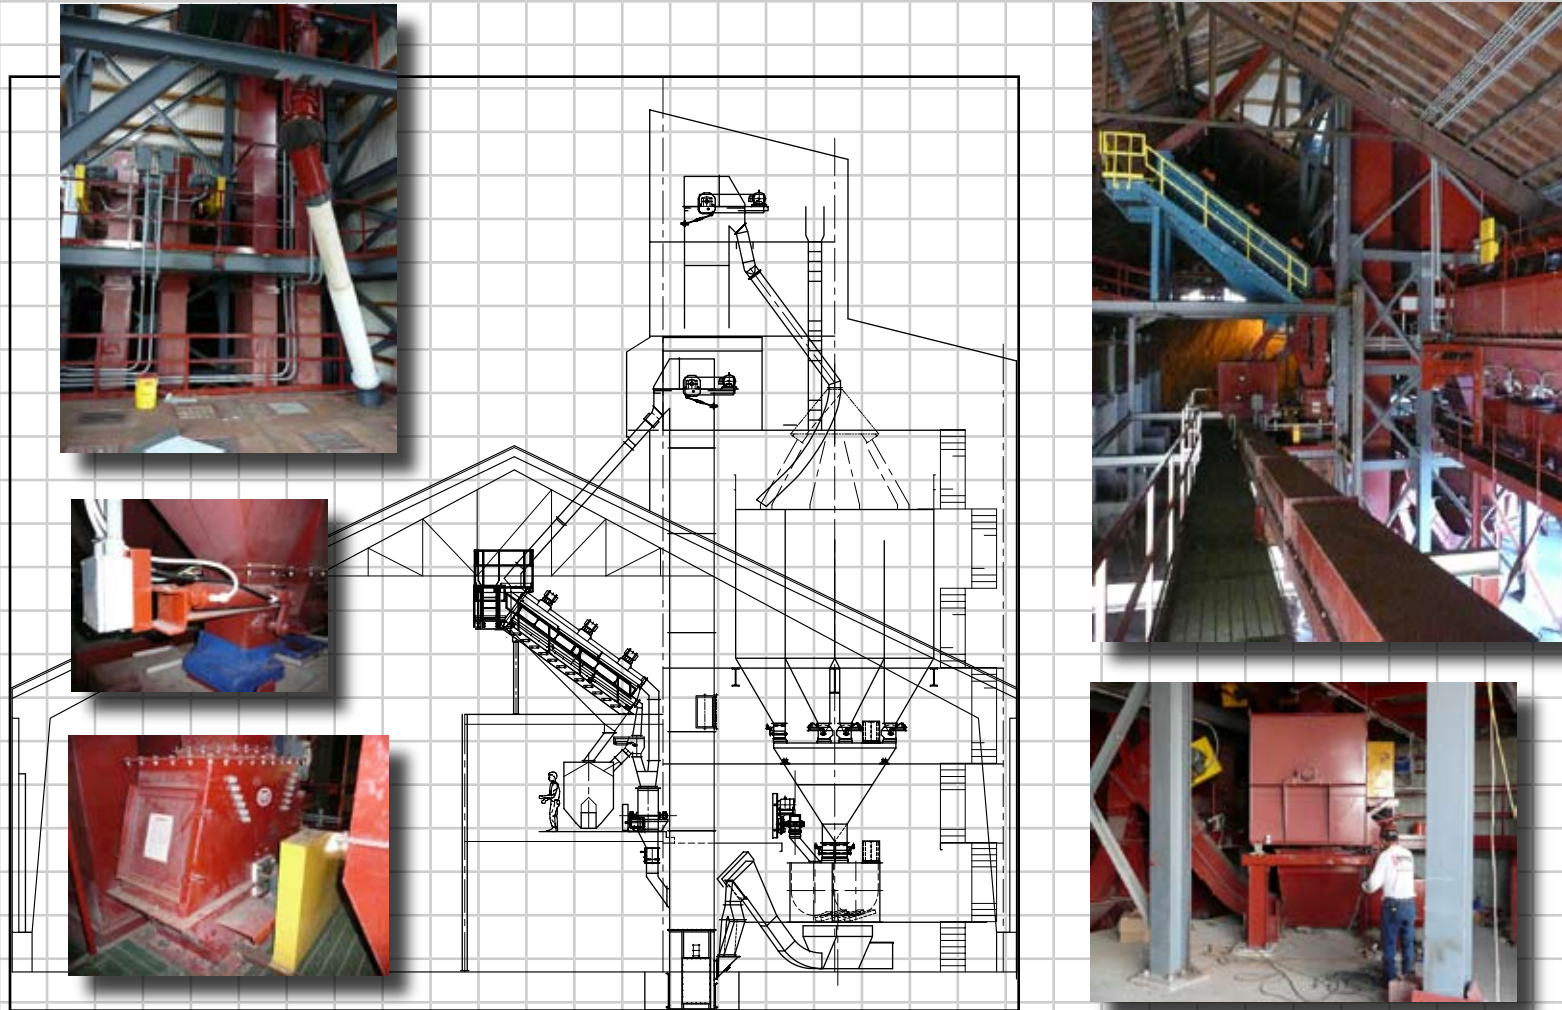

Pg. 1 of 4

Job Scope: Convert existing warehouse into a high output blend plant for bulk blends. Receive from two rails and one truck dump at 200 TPH. Fill two rows of bins on two sides of center aisle. For blending, install 200 TPH blend tower with 16 major bins and 16 micro bins. Automate and simplify micronutrient additive system to allow use of bulk bags, increase speed and accuracy while decreasing manpower. Screen out overs in two cuts to maximize quality control. Load blends into 24 ton side dump trailers with four hoppers.
